

FOR IMMEDIATE RELEASE

May 9th, 2018

**BTE AND DIH MEDICAL'S NEW PARTNERSHIP TRIPLES CHINA'S ACCESS TO INNOVATIVE,
FUNCTION-BASED REHABILITATION EQUIPMENT**

HANOVER, MD and BEIJING, CHINA - BTE is pleased to announce the naming of DIH Technology (China) as its representative in The People's Republic of China, bringing innovative therapeutic technology to providers and patients. Tripling BTE's representation in China, this new agreement will bring new solutions to physical, occupational, sports, and general rehabilitation practices.

The representation agreement combines BTE's expertise in therapeutic equipment with DIH's respected leadership in China's rehabilitation industry. BTE is a worldwide name in rehabilitation equipment, providing interactive systems for function-based rehabilitation, physical job training, and return-to-work services. Now a highly valued new representative, DIH connects medical providers with the best devices in the market.

BTE's premiere equipment provides objective data for clinicians, job-specific task simulation for employers, and interactive, game-like feedback for patients. Beginning May 1st, 2018, DIH will offer the following equipment, among others:

- **BTE Primus RS** – PrimusRS is the pinnacle of BTE's evidence-based philosophy – physically rehabilitating patients – functionally. It includes four platforms all in one smart system: upper and lower extremity, lift, cable column, and task simulation. With the ability to replicate any functional activity, it utilizes isotonic, isometric, and isokinetic muscle loading, and provides continuous passive motion functionality.
- **BTE Eccentron** – Eccentron is the advanced eccentric strength training system that revolutionized what is possible in rehabilitation today. It is the only device proven to deliver the benefits of eccentric resistance in a safe, closed-chain manner. This allows clinicians to provide unique benefits for diverse patient populations. Eccentron is vital in the rehabilitation and conditioning of high performance athletes and everyday patients alike. It is also a key component of innovative fall prevention programs for the aging population.

- BTE Multi-Cervical Unit – The MCU is the most effective and complete system for the assessment and rehabilitation of patients suffering from neck pain, whiplash associated disorders (WAD), and general cervical spine disorders. The MCU is an unmatched, research-backed tool that empowers physical therapists and chiropractors alike to objectively evaluate, strengthen, and restore the ailing neck and cervical spine.
- BTE EvalTech - EvalTech is the complete functional testing system. It allows clinicians to perform complete Functional Capacity Evaluations with automated, objective reports. It is also the only system of its kind with scientifically researched positional tolerance and time-motion testing. With EvalTech, clinicians can easily perform peer-reviewed, standardized testing protocols, or design their own custom tests – leading to better patient decisions and outcomes.

Charles Wetherington, BTE’s President, sees this new chapter with DIH as a “unique opportunity to improve the positive clinical outcomes in the physical rehabilitation needs of millions of patients in China.” Jason Chen, President of DIH, shares the excitement, and is “thrilled to kick start our new strategic partnership.” Dr. Oliver Kieffer, C.E.O. of Revitalizing Rehabilitation Solutions, a leader in rehabilitation solutions in Germany and solution provider for DIH, states that he is “happy to start a new chapter in the cooperation with BTE and DIH.” Through continued partnership, BTE and DIH aim to help patients in China get back to work, back to sport, and back to life – faster and more fully.

About BTE

BTE’s expertise is human physical performance evaluation and treatment. Our Rehabilitation Equipment provides advanced evidence-based physical therapy systems for clinics, hospitals, and private practices. With BTE, people and companies achieve better outcomes. Visit btetech.com to learn more about BTE's comprehensive products and services. Follow us on Facebook, Twitter (@btetech) or LinkedIn to stay up to date on relevant news.

About DIH

DIH stands for the corporate vision to “Deliver Inspiration and Health” with an aim to transform the way healthcare is delivered and to inspire a new health 4.0 eco-systems through transformative mindsets that uniting the best technologies, experts & leaders, and resources into an accelerating force of innovation. Combining advanced robotic systems, VR, and automation software, DIH provides state-of-the-art, cloud-based “total solutions” to make a difference in the continuous therapeutic & human performance interventions; with objective to

significantly reduce disability & impairment, to avoid huge productivity loss and deteriorating health consequence. To accelerate the realization of its vision, DIH has enjoyed the honor of merged global robotics Switzerland-based Hocoma, the global leader for robotic and sensor-based devices for functional movement therapy, Dutch-based global VR & Movement Platform leading provider Motek, and Dutch leading rehabilitation clinical pathway provider MRS. In addition, DIH works closely with strategic partners such as Tyromotion, NuStep, RRS etc.
